

Quality Promotion

Looking at the impressive growth which the SME sector has registered in the last few years, especially in the field of light engineering, textiles, biotech and IT, the State Government will give special focus on the SME sector to achieve its objective of high growth with greater employment opportunities. The Government will, therefore, initiate measures to address the challenges faced by the SME sector in the areas of availability of cheap and timely finance, technology upgradation, upgradation of skill sets of those employed in this sector and marketing. The State will also take all necessary measures to complement the initiatives proposed by the Central Government in its **Small** & Medium Enterprises Bill, including setting up of a special institution for the SMEs. It will also provide the following incentives to **promote quality competitiveness, research** and development and technology upgradation
