

Mizoram

Technology Support

- While making the policy resolutions in 1989, the Govt. Was fully aware of the objectives of the Central Govt. in regards to upgradation of technology, export promotion, balanced growth, broad-basing entrepreneurial skill and to improvement of technical skill for rapid growth of industries under a fast changing industrial scenario of the country.
- Handloom and Handicrafts, which is a traditional industry in Mizoram, will continue to receive prime attention from the government. Modernization of this sector by induction of improved design and technology to make it an export oriented sector will be encouraged and promoted.
