

Quality Promotion

Quality Control

Small Scale Industries

The Government will also arrange necessary testing facilities in order to ensure strict quality control. Proper marketing support will also be extended by ensuring price preference and other benefits in Government purchases.

Handloom

Quality yarns of appropriate counts will be made available at reasonable prices through NHDC and NEHDC and other sources. Part of the yarn requirement would be met by setting up a Spinning Mill in the Co-operative sector. The Mechanised Dye-cum-Process House will provide services to all weavers including the co-operative sector. The supply of raw materials as well as procurement of finished goods will be regulated by THHDC and Apex Weavers Co-operative Society in a co-ordinated and systematic manner.

Handicraft

The THHDC will continue to supply quality raw materials. Forest Department will take up cultivation of raw cane, which is in short supply. THHDC will re-organise its marketing wing and scientific inventory control will be introduced with proper market feedback data.
