

POWER RELATED

- I. The State of Uttarakhand has adequate availability of Power and is aiming to further increase Hydro Power production by over 5000 MW before the end of present decade. A number of small & medium size hydro-sites have already been identified to be developed in the private sector or in public-private partnership, besides development of projects in the public sector. Thus assured supply of quality power will be made available to the entrepreneurs setting up Industrial Units in the State.
- II. The State of Uttarakhand has adequate availability of Power and is aiming to further increase Hydro Power production by over 5000 MW before the end of present decade. A number of small & medium size hydro-sites have already been identified to be developed in the private sector or in public-private partnership, besides development of projects in the public sector. Thus assured supply of quality power will be made available to the entrepreneurs setting up Industrial Units in the State.
- III. As per Electricity Reforms Act, the tariffs are to be determined and regulated by the State Electricity Regulatory Commission. However, with the addition of capacities, augmentation of existing capacities and expansion and revamping of transmission and distribution network, power will be available to Industrial units in the State at the attractive and competitive rates.
- IV. There is no restriction in the State in using power during the peak hours. However, the tariff for continuous and non continuous supply is to be fixed by the Regulatory Commission.
- V. As a large investment is being made in the distribution network, it will enable substantial reduction in the system loading charges.

- VI. District level Udyog Mitra will sanction load upto 50 BHP and the load above 50 BHP will be sanctioned by the Regional Committee of the Uttaranchal Power Corporation Limited (UPCL).
- VII. The minimum charges shall be subsumed in the monthly bill.
- VIII. Industrial consumers shall also have the option to lay their own line from the nearest sub-station of the Uttaranchal Power Corporation through registered engineers/contractors at their own cost.
