

eProcBay® provides Rapid Operations Automation & Management Service for MSMEs

SMEs are adopting automation solutions to ensure high quality products, enabling them to be competitive and face multiple challenges. eProcBay Services provide simple, yet powerful, solutions to ensure success for SMEs. Edge Business Solutions Private Limited has especially designed the services to suit the Indian working environment. It is focussed on optimizing operating cost through automation whether it is inventory tracking, work in progress stages, job-work, vendor production tracking, material planning & costing, purchase & sales order tracking, quality compliance etc.

The subscription is based Zero Cost Variance pricing which ensures no hidden costs. The annual cost for eProcBay Services for a Single Manufacturing Unit business could range from 0.01% to 0.1% of their annual turnover. Subscribers to eProcBay Services get access to best operations management practices, cross-learning from other manufacturers and domain expertise. It also safeguards clients from potential Knowledge Loss, Information Security Breaches, Disruptions due to Technology Breakdown, Reduce Vendor Dependence, Loss of Control due to Delegation, Resistance to Change due to Additional Workload & Increased Risk of Attrition due to Increased Skill Levels.

Clients have been able to reduce error rates in material planning & procurement to almost zero. The services are designed to ensure quick learning, easy to use and no special skills are needed to handle the operations. “The cloud based service delivery ensures uninterrupted global access to its subscribers round the clock,” says Rajiv Gupta, CEO, eProcBay Services.

The clients are spread over 12 Industrial Clusters across Northern and Western India which include manufacturers of electrical components, power equipment auto components, handicrafts, plastic ingredient, sheet metal components, light & heavy engineering products like industrial machines etc.
